Key Insights – Bank Marketing Campaign Analysis

- Job role has a strong influence on subscription behavior, with administrative, technician, and management groups showing higher term deposit subscription rates.
- Customers contacted through the **cellular method** respond more positively compared to telephone contact, making it a more effective communication channel.
- Campaign effectiveness varies across months, with certain months showing higher customer engagement and better subscription outcomes.
- Higher education levels show a relatively better likelihood of subscription, indicating education influences financial decision-making behavior.
- Longer call duration is associated with higher subscription probability, showing that customer engagement time directly impacts conversion rates.
- Economic indicators such as **Euribor rate and employment trend** significantly influence customer subscription decisions, highlighting the role of financial conditions in marketing success.
